

# Femco®

DRAINECHNOLOGY

The FEMCO SYSTEM can be used on all equipment where a fluid needs changing cleanly and efficiently. Simply replace the factory fitted plug.

**No special tools are needed!**

## SIMPLE OPERATION

1

Remove cap

2

Fit drainer

3

Drain fluid

HOT oil, fuel or water drains quickly and safely by either GRAVITY or SUCTION.

The 'Standard' plug is shown above, the 'Compact' & 'Speed-Click' operate similarly.

## DESIGN FEATURES

- The dustcap keeps the threads clean.
- Materials used resist corrosion; brass body, stainless steel spring and viton internal seal.
- Full range of sizes and thread patterns: METRIC, UNF, UNC, BSP, BSW, NPT etc.
- Chain retained dustcap, magnetic valves and all spares readily available.
- Custom sizes available.

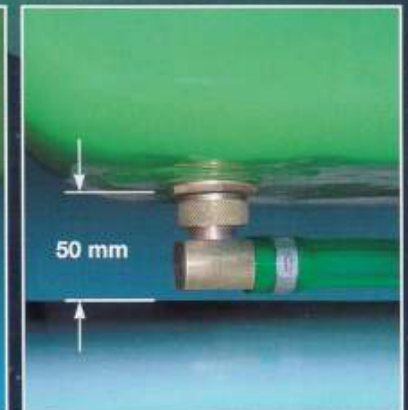

Make messy oil changes a thing of the past! .....

*helping to keep our environment clean.*

Side fitted drainplug

Restricted installation

## APPLICATIONS

- Buses • Coaches • Trucks • Excavators
- Cranes • Engines • Military • Railway
- Forestry • Agriculture • Shipping • Aviation
- Power Generation • Transmissions
- Drilling Rigs • Industry • Pumping

## DRAIN PLUG SYSTEMS

### STANDARD

Our original thread-on drain plug system. This system works with the widest variety of applications.

### COMPACT

Very similar to the standard series, only a lower profile. A great choice when clearance is an issue.

### SPEED-CLICK

Our quick-coupling system. It is very popular with the larger fleets where used with a suction system.

### XXL

For high flow rates with drain plugs in excess of 38mm.

## DRAINERS & ACCESSORIES

Straight and right-angled drainers of various lengths, non-return valves, samplers, drain trays etc.

Femco carries a wide range of products to make your fluid draining run even smoother.
